PUBLIC SERVICE COMMISSION

April 2, 2010

DIRECTOR OF ENGINEERING KENTUCKY PUBLIC SERVICE COMMISSION P O BOX 615 211 SOWER BLVD FRANKFORT KY 40602

Dear Sir or Madam:

Enclosed with this cover letter is the reliability report for the year 2009 as required per case/order number 2006-00494. Please pardon the lateness of this report, for we still must manually integrate old data into the newer data, which is provided by more automated means. Meade County RECC is amidst the integration of our new outage management system. Within this report, you will find the SAIDI, CAIDI and SAIFI indices for the last five (5) years as Meade County has measured, recorded and reported it internally for many years. These indices are calculated in two manners: (1) with all outages and (2) without all power supplier and storm related outages.

Also included is MCRECC's system summary depicting the three (3) indices excluding the calculated major event days as IEEE 1366 prescribes. Due to the large undertaking necessary to convert and incorporate prior data into these calculations, this method was used for 2007 – 2009 outage numbers only.

The report also depicts the worst ten (10) performing circuits and their causes for each index within the system. The ten (10) leading causes for each index are also included in the report. Major event days are excluded in each of these categories.

Included in this packet is a CD, which contains all but this cover letter and the five-year reliability report as described in the first paragraph. If you should have any questions or concerns, you may contact me @ (270) 422-2911, ext. 3149.

Sincerely,

David R. Poe, Vice President Operations & Engineering
